<b>Chapter 1 — Purposes of and Need for Action.....</b>	<b>1</b>
<i>Purposes of and Need for Action .....</i>	<i>1</i>
<i>Proposed Action and Scope of Work .....</i>	<i>2</i>
<i>Background.....</i>	<i>4</i>
Authority .....	4
Rogue River Basin Project Description .....	4
Early Powerplant/Wasteway Designs .....	4
Wasteway Construction and Modification.....	5
<i>Construction Permits .....</i>	<i>5</i>
<i>Flowage Easements, Rights-of-Way, and Wasteway Access .....</i>	<i>6</i>
<i>A Decision to Make .....</i>	<i>7</i>
<i>Scoping Process and Issues Identified.....</i>	<i>7</i>
Land Ownership and Access.....	8
Geologic Features .....	8
Water.....	8
Vegetation.....	8
Fish, Wildlife, and Aquatic Resources .....	9
Social Aspects .....	9
Alternatives and Study Types .....	9
Management and Infrastructure .....	9
Issues Outside the Purposes of and Need for Action.....	9
<b>Chapter 2 — Alternatives .....</b>	<b>11</b>
<i>Alternatives Considered But Eliminated From Further Consideration .....</i>	<i>11</i>
<i>Alternative 1 – No Action.....</i>	<i>11</i>
<i>Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....</i>	<i>12</i>
Surveying the Wasteway Channel .....	12
Acquiring Additional Flowage Easements and Rights-of-Way.....	13
Proposed Work Sequence .....	13
Bioengineering Techniques .....	13
Standard Engineering Techniques .....	18

Access Road.....	19
Monitoring and Maintenance .....	21
<i>Alternative 3 – Bioengineering Only</i> .....	22
Easements, Rights-of-Way, and Land Surveys.....	22
Proposed Work Sequence .....	22
Bioengineering Techniques .....	22
Access Road.....	22
Monitoring and Maintenance .....	23
<i>Alternative 4 – Standard Engineering Only</i> .....	23
Easements, Rights-of-Way, and Land Surveys.....	23
Proposed Work Sequence .....	23
Standard Engineering Techniques .....	23
Access Roads .....	24
Monitoring and Maintenance .....	24
<b>Chapter 3 – Affected Environment and Environmental Consequences .....</b>	<b>25</b>
<i>Geology</i> .....	25
Affected Environment.....	25
Wasteway Erosion and Landslides .....	26
Reclamation's Geologic and Geotechnical Studies .....	26
Privately Completed Studies.....	26
Hicks Reports.....	26
1999 Tyler Creek Monitoring Project.....	27
Future Detailed Geologic or Geotechnical Studies.....	28
Environmental Consequences.....	28
Alternative 1 – No Action.....	28
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering .....	28
Alternative 3 – Bioengineering Only .....	29
Alternative 4 – Standard Engineering Only .....	29
Cumulative Effects.....	29
Mitigation.....	30
<i>Water Quality</i> .....	30
Affected Environment.....	30
Water Temperature .....	31
Sediments.....	32
Nutrients.....	32
Diluted Pollutants.....	35
Drinking Water .....	35
Environmental Consequences.....	35
Alternative 1 – No Action.....	35
Alternative 2 (Preferred Alternative) – Bioengineering Combined with Standard Engineering .....	36
Alternative 3 – Bioengineering Only .....	36
Alternative 4 – Standard Engineering Only.....	36

Cumulative Effects.....	36
Mitigation.....	37
<i>Wetlands</i> .....	37
Affected Environment.....	37
Environmental Consequences.....	38
Alternative 1 – No Action.....	38
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	38
Alternative 3 – Bioengineering Only.....	39
Alternative 4 – Standard Engineering Only.....	39
Cumulative Effects.....	39
Mitigation.....	39
<i>Vegetation</i> .....	39
Affected Environment.....	39
Environmental Consequences.....	42
Alternative 1 – No Action.....	42
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	42
Alternative 3 – Bioengineering Only.....	42
Alternative 4 – Standard Engineering Only.....	42
Cumulative Effects.....	43
Mitigation.....	43
<i>Fish and Wildlife</i> .....	43
Affected Environment .....	43
Fish.....	44
Amphibians and Reptiles .....	44
Birds.....	45
Mammals.....	45
Environmental Consequences.....	45
Alternative 1 – No Action.....	45
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	46
Alternative 3 – Bioengineering Only.....	46
Alternative 4 – Standard Engineering Only.....	46
Cumulative Effects.....	46
Mitigation.....	47
<i>Threatened and Endangered Species</i> .....	47
Gentner's Mission-Bells.....	47
Affected Environment.....	47
Environmental Consequences .....	48
Alternative 1 – No Action.....	48
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	48
Alternative 3 – Bioengineering Only.....	48
Alternative 4 – Standard Engineering Only.....	49

Bald Eagle.....	49
Affected Environment.....	49
Environmental Consequences.....	50
Alternative 1 – No Action.....	50
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	50
Alternative 3 – Bioengineering Only.....	50
Alternative 4 – Standard Engineering Only.....	50
Northern Spotted Owl.....	50
Affected Environment.....	50
Environmental Consequences.....	51
Alternative 1 – No Action.....	51
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	51
Alternative 3 – Bioengineering Only.....	51
Alternative 4 – Standard Engineering Only.....	52
Southern Oregon/Northern California Coasts ESU Coho Salmon .....	52
Affected Environment.....	52
Environmental Consequences.....	52
Species Comparison Table.....	52
Cumulative Effects.....	53
Mitigation.....	53
<i>Historic Properties</i> .....	53
Affected Environment.....	53
Early Occupation of Southwest Oregon .....	54
Existing Wasteway and Access Right-of-Way Conditions .....	54
Archeological Investigations .....	55
Environmental Consequences.....	58
Alternative 1 – No Action.....	58
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering.....	58
Alternative 3 – Bioengineering Only.....	59
Alternative 4 – Standard Engineering Only.....	59
Cumulative Effects.....	59
Mitigation.....	59
<i>Indian Sacred Sites</i> .....	60
Affected Environment.....	60
Environmental Consequences.....	60
<i>Indian Trust Assets</i> .....	60
Affected Environment.....	61
Environmental Consequences.....	61
<i>Cascade Siskiyou National Monument</i> .....	61
Environmental Consequences.....	63
Cumulative Effects.....	63
Mitigation.....	63

<i>Environmental Justice</i> .....	63
Affected Environment.....	64
Environmental Consequences .....	64
<b>Chapter 4 — Consultation and Coordination.....</b>	<b>65</b>
<i>Public Involvement</i> .....	65
<i>Agency Consultation and Coordination</i> .....	66
Endangered Species Act of 1973 .....	66
National Historic Preservation Act of 1966, as Amended.....	66
Bureau of Land Management Coordination .....	67
<i>Tribal Consultation and Coordination</i> .....	67
<i>Adjacent Landowners</i> .....	67
<i>Other Contacts</i> .....	67
<b>Chapter 5 — Environmental Commitments .....</b>	<b>69</b>
<i>Soil</i> .....	69
<i>Water</i> .....	69
<i>Wetlands</i> .....	69
<i>Vegetation</i> .....	70
<i>Fish and Wildlife</i> .....	70
<i>Historic Properties</i> .....	70
<i>Sacred Sites</i> .....	71
<i>Cascade Siskiyou National Monument</i> .....	71
<b>Chapter 6 — References.....</b>	<b>73</b>
<i>Glossary References</i> .....	73
<i>Chapter 1 References</i> .....	73
<i>Chapter 2 References</i> .....	73
<i>Chapter 3 References</i> .....	73
<i>Chapter 4 References</i> .....	77
<i>Chapter 5 References</i> .....	77

## Tables

Table 3-1.     Vegetation Found in the Local Vicinity of the Work Area .....	41
Table 3-2.     ESA Species Effects .....	53
Table 3-3.     2000 Jackson County, Oregon, Census Statistics .....	64

## Figures

Frontispiece.	Location Map .....	i
Figure 1-1.	A portion of the area of considerable erosion .....	2
Figure 1-2.	Proposed work area .....	3
Figure 1-3.	Berm prevents wasteway flow from entering the area of considerable erosion and directs it into another natural channel .....	5
Figure 1-4.	Approximate 2002 land ownership and Reclamation rights-of-way .....	6
Figure 2-1.	Near vertical wasteway banks .....	15
Figure 2-2.	Live cribwalls .....	15
Figure 2-3.	Vegetated gabions .....	15
Figure 2-4.	Sloughing banks .....	16
Figure 2-5.	Tree revetments .....	16
Figure 2-6.	Live fascines .....	16
Figure 2-7.	Live stakes .....	17
Figure 2-8.	Brush mattresses .....	17
Figure 2-9.	Example of a small hand-placed rock energy dissipater .....	17
Figure 2-10.	Example of backfill and riprap armament with minimal concrete and metal components .....	18
Figure 2-11.	A culvert site where standard engineering techniques would be beneficial .....	19
Figure 2-12.	A bridge site where standard engineering techniques would be beneficial .....	19
Figure 2-13.	Access road alignment .....	20
Figure 2-14.	The 12-foot-wide primitive dirt road, ungraveled and unpaved, would consist of two tracks across existing pasture or an existing primitive road .....	21
Figure 3-1.	Streams exceeding water temperature standards [based on 1998 Oregon State 303(d) list] .....	32

Figure 3-2.	Wetlands adjacent to the proposed access road alignment .....	38
Figure 3-3.	Tyler Creek wasteway in relation to Klamath-Siskiyou Ecoregion .....	44
Figure 3-4.	Wasteway in relation to Cascade-Siskiyou National Monument .....	62

## **Attachments**

Attachment A Endangered Species Act Correspondence

Attachment B National Historic Preservation Act Correspondence

Attachment C Tribal Consultation

Attachment D Mail Distribution List
